

Security Doors

Turnkey Security Door Solutions

- **Completely Pre-Assembled**
- **Galvanized Steel Construction**
- **Welded Joints Throughout**
- **Metal or Glass Doors**
- **Standard & Custom Sizes**
- **Choice of Exit Hardware**
- **Optional Keyless Entry**

LockNet Security Doors are pre-assembled in a controlled environment by skilled craftsmen. They arrive at your location ready for installation - installation that requires little or no on-site assembly -- saving you hours of on-site labor. These doors are extra heavy duty, constructed of galvanized 14-gauge steel for the frame and galvanized 16-gauge steel for the door itself.

Door Options

When you are choosing a security door from LockNet, you may select either our heavy duty, hollow metal security doors or an aluminum frame glass door. LockNet also offers a variety of exit hardware options. You can select our standard rugged and secure exit hardware package, or you may upgrade to any of several systems with or without the following features: alarms, high security mechanisms and electronic access control using either a keypad or a hand-held wireless remote.

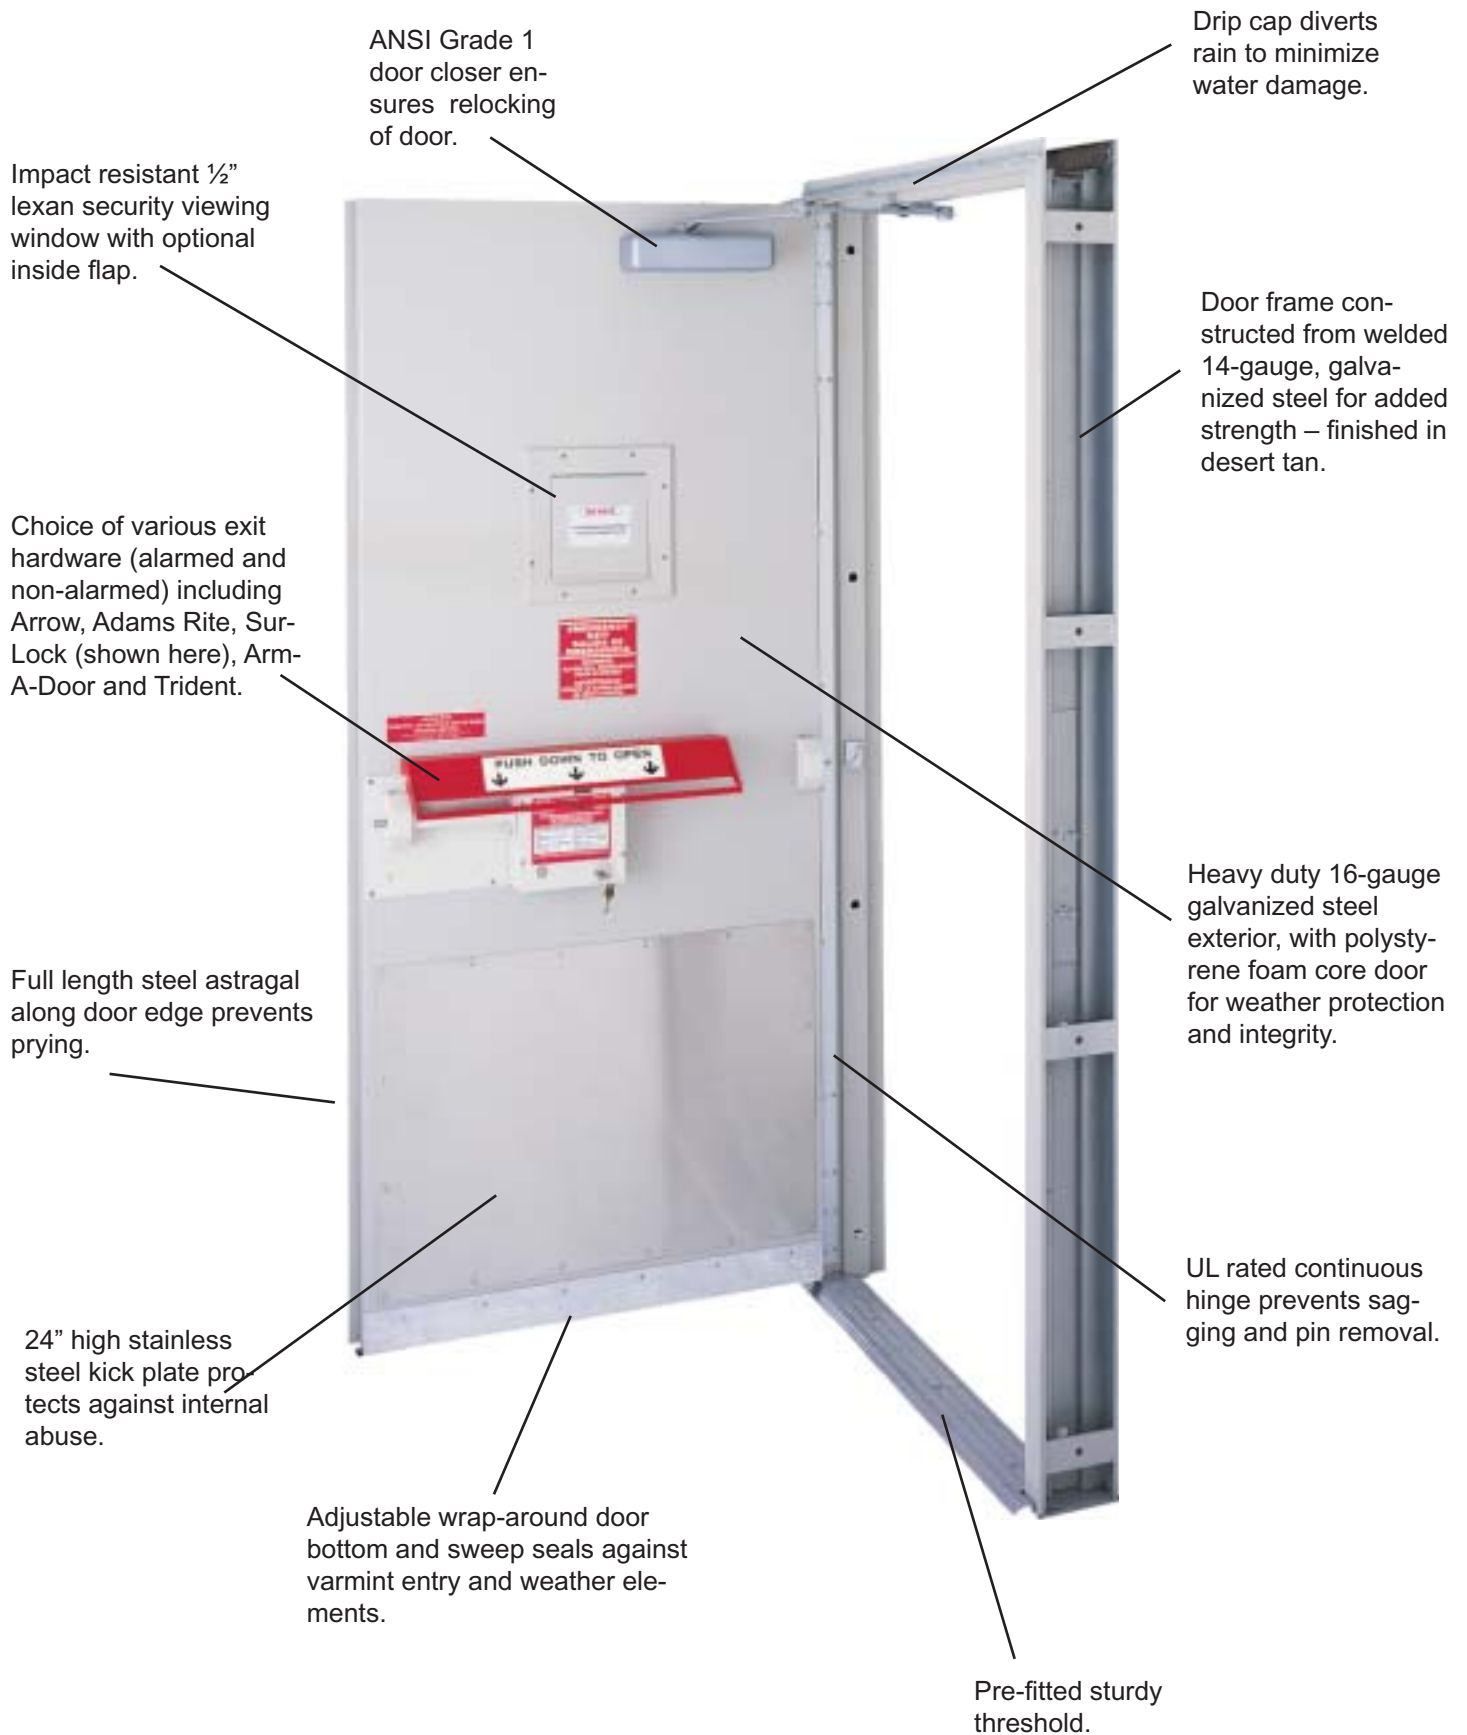

ADA Compliant

With the recent passage of the Americans with Disabilities Act, exit devices are becoming an essential and integral part of meeting ADA requirements. LockNet's ADA compliant exit/entry devices offer excellent asset and life protection at competitive prices.

LockNet Security Door Applications

- Rear Delivery Entrances
- Fire Safety Exits
- Secure Storage Rooms
- Controlled Building Fronts
- New Construction
- Renovation Projects

Specifications

Exit Device Selection Guide

Various Exit Devices

A wide variety of exit devices are available to meet your specific needs, and are available for both LockNet's standard doors and our glass doors. Whether or not you need keyless entry helps determine which exit device is best suited to your application. These exit devices are durable and selected to provide you the best in long life and outstanding performance.

**Security Products & Services...
That Never Sleep**

LOCKNET®

Options

Keyless Entry Systems

Keyless entry systems are available to add convenience and security to your access needs. Extraordinarily durable, these systems are equipped with stainless steel keypads to withstand the harshest of environments. They are also very simple to operate and codes can be re-programmed easily to

accommodate changing personnel needs.

Glass Doors

LockNet security doors are available in full-pane glass door configurations for storefront applications. These aluminum doors offer outstanding durability with the visibility of a full glass pane.

Warranty

LockNet Security Doors come with a 14-month parts & labor warranty. Additional warranties include a lifetime parts warranty on the hinge, a 25-year parts warranty on the door closer and a 5-year parts warranty on Sur-Lock exit devices.

Descriptions and specifications subject to change without notice.

Wireless Remote Entry Systems

Wireless remote entry systems are also available with LockNet security doors. These permit your staff members to easily unlock the door from several feet away. This level of convenience discourages employees from propping doors open while allowing them quick and easy access.

Installation at Your Site

Before installation, LockNet staff members will take the necessary measurements and build the door to your exact specifications, including your chosen exit hardware. Rough and finished measurements are critical to a good door fit, so we go to great lengths to ensure that we provide the right product for your application. When the door arrives, the installer simply bolts the LockNet security door into place, and installs supporting components (threshold, sweep, drip cap, etc.) and any desired options (keyless controller, keypad, etc.).

LockNet is a leading single source provider of doors, door hardware, locking systems, keying systems, safe systems and other related security and locksmithing services. LockNet can provide a customized program to fit your needs by offering a single point of contact for New Construction, Facilities Maintenance and Loss Prevention. Throughout the US and Canada, LockNet's network of service and installation professionals assures you of high quality services and timely response. Our web-based information management system provides the current status of each of your projects and service requests. All of this, combined with our 24/7 toll free technical support and service request hotline, makes LockNet your solution provider of choice. Call LockNet today.
